

Sania Khushbakht Jamil

Product Owner & AI Prototyper · SaaS · Payments · Vibe-Coded Prototyping

+46 76 610 97 81 | saniak.jamil@gmail.com | linkedin.com/in/saniakjamil | saniajamil.com

SUMMARY

Product Owner with a computer-science background who builds, not just specs. Seven years shipping SaaS products across payments, insurance, and subscriptions — and increasingly building the prototypes myself with Claude Code instead of waiting on engineering. I turn vague ideas and messy requirements into working prototypes fast, then into shipped products with real adoption. English- and Urdu-speaking, based in Sweden. Portfolio of vibe-coded side projects at saniajamil.com.

SKILLS

AI & Prototyping: Vibe coding · AI-assisted prototyping · Claude / Claude Code · Rapid prototyping · LLM context training · Prompt engineering

Technical: React.js · JavaScript · API-first architecture · Systems integration · SQL / analytics · Data-layer design

Product: Product discovery · Roadmapping · Backlog prioritization · KPI definition & tracking · User research · Subscription lifecycle

Ways of working: Agile (Scrum, Kanban, SAFe) · Cross-functional leadership · Stakeholder alignment · Global rollouts

EXPERIENCE

Senior Product Owner — Nexure (Sales Platform), Electrolux

Sep 2023 – Present · Sweden (7-month secondment to Munters, Oct 2024 – Apr 2025)

- **Built working feature prototypes with Claude Code** — including a fraud-detection LLM and a chargeback solution — to align engineering, design, and ops around a shared vision and cut time-to-market.
- **Trained an LLM on our product context** to act as a “knowledge PO,” answering other POs’ questions and raising documentation quality.
- Led end-to-end delivery and strategy of a high-volume B2B/B2C sales engine for insurance and service products in a regulated, high-velocity environment.
- **Drove the V1 → V2 architecture transition:** 40% less operational effort, 30% higher dev velocity, and time-to-market halved.
- Launched a consumer-facing payments platform (Klarna, Adyen, Stripe, cash) alongside B2B integrations with insurance providers.
- Designed and shipped an offer/price configurator with dynamic, behaviour-based pricing and automated user flows, lifting retention ~10%.
- Coordinated synchronized 4-country rollouts across the EU and NA — migrating 3 countries in a single quarter — aligning engineering, QA, UX, and ops.
- Used KPIs (ROI, conversion, NPS, CSAT) to steer the roadmap and track progress.

AI Training Contributor (Independent) — Mercor

Sep 2023 – Present · Remote

- Train and evaluate AI models as a general domain expert for a top-tier AI provider (alongside the Electrolux role).

Delivery Lead / Transformation Manager (IFS ERP) — Munters

Oct 2024 – Apr 2025 · Sweden

- Led an end-to-end IFS ERP rollout for a Czech manufacturing site, driving adoption of standardized global processes and unified data models.
- Designed a repeatable rollout framework (governance, templates, operating model) later reused for the Sweden and US implementations.
- Applied process mining to surface bottlenecks and improve rollout efficiency.

Solutions Engineer → Solution Delivery, Post-Purchase Enterprise Services — Electrolux

Sep 2020 – Aug 2023 · Sweden

- Led discovery and solution engineering for web-based appointment booking and payments; designed integration flows with engineering and piloted in one market.
- Coordinated UX, engineering, QA, and commercial teams through MVP development and release.
- Ran a synchronized 4-country rollout, aligning business, engineering, and ops on readiness and a consistent customer experience.
- Prioritized the enhancement backlog using KPIs, incident data, and adoption signals.

Software Engineer — VentureDive

Jun 2018 – Mar 2020 · Pakistan

- Built front-end and back-end features for healthcare and supply-chain platforms, working closely with Product to turn requirements into shipped functionality.

SIDE PROJECTS

saniajamil.com — personal tools and prototypes vibe-coded with Claude to make daily work more efficient. [Add 1–2 named projects + a one-line outcome each — these are the strongest proof for prototyping roles.]

CERTIFICATIONS

- SAFe Release Train Engineer (2023) · IBM Product Owner, Coursera (2025)

EDUCATION

- BS, Computer Science — Ghulam Ishaq Khan Institute of Engineering Sciences & Technology, Pakistan · 2018 · CGPA 3.44/4.00
